Summary

Full-stack web developer who builds responsive, data driven web applications with React, Next.js, TypeScript, Node.js, and MongoDB or PostgreSQL. I have worked on a team booking platform during an internship, built full-stack apps on my own, and recently made an online store with server-side validation and a PostgreSQL database. Co-founder of an early-stage startup. Comfortable with Git workflows, code reviews and working in a team.

Work Experience

Co-Founder & Full-Stack Developer | Early-stage technology startup | 2026 – Present

- Co-founded a startup with a small team and build its web application as a full-stack developer.
- Work with the founding team on product planning, feature development, and release.

Frontend Developer Intern

Tech Studio Academy April – June 2026

- Worked with a team of developers on the frontend of Miles Car Rental, a vehicle reservation and fleet management platform.
- Built responsive, reusable components with React, TypeScript, and Tailwind CSS.
- Connected the interface to backend REST APIs for the booking experience.
- Used Git and GitHub for version control, took part in code reviews, and fixed bugs throughout development.

Projects

NOIR & CO | Full-Stack Developer

October 2026

Tech Stack: Next.js, TypeScript, Tailwind CSS, PostgreSQL, Prisma, Zod
Live Demo: noir-and-co-store.vercel.app | *Code:* github.com/haykaysweb/noir-and-co

- Built an online store with category browsing, filters stored in the URL, persistent cart and wishlist, and checkout flow.
- Validated the checkout, contact and newsletter forms on the server with Zod and Next.js Server Actions, and saved the data to PostgreSQL with Prisma.
- Kept prices out of the browser: the cart stores only product ids and quantities, and the server looks up prices at checkout.
- Used server components by default and client components only where state or events were needed.

Laundry Wash Platform | Full-Stack Developer

August – December 2025

Tech Stack: React, JavaScript, Tailwind CSS, Node.js, Express.js, MongoDB
Live Demo: laundry-wash.vercel.app | *Code:* github.com/haykaysweb/LAUNDRY-WASH

- Designed and built the frontend and backend of an on-demand laundry service platform.
- Built REST APIs for user authentication, bookings, and service requests.

- Built an admin dashboard for managing requests and orders, with responsive interfaces for desktop and mobile.
- Stored application data in MongoDB with Mongoose.

Miles Car Rental | Frontend Developer (team project)

April-June 2026

Tech Stack: React, TypeScript, Tailwind CSS, MongoDB, Node, Express.js
Live Demo: milescar-rental.vercel.app | *Code:* github.com/Chrischuka13/miles-car-rental-frontend

- Worked with other developers on the frontend of a vehicle reservation and fleet management platform.
- Engineered the vehicle listing interface with dynamic search filters, allowing users to filter and seamlessly browse through all available cars.
- Built the car details page, displaying complete vehicle specifications, pricing, and features to guide user selection.
- Integrated components with backend REST APIs, enabling real-time data fetching for vehicle inventory and specification updates
- Developed the admin fleet management dashboard, building interactive features and modal forms to streamline uploading and managing rental vehicles.

Skills

Languages
JavaScript, TypeScript, HTML5, CSS3

Frontend
React, Tailwind CSS, Next.js, Tan Stack Query (ReactQuery), Framer Motion, Axios

Backend
Node.js, Express.js, REST APIs, JWT authentication, Zod, Next.js Server Actions

Tools
Git, GitHub, Vercel, Postman, Figma, Browser DevTools

Databases
PostgreSQL, Prisma, MongoDB, Mongoose

Practices
Responsive web design, API Integration, component based architecture

Education

Bachelor of Arts in Linguistics and Nigerian Languages

Ekiti State University, Ado-Ekiti, Ekiti State, Nigeria — Graduated: February 2025
Degree Classification — Second Class Upper (2:1)

National Youth Service Corps (NYSC) — Completed | 2025 – 2026

Certifications

Java Script Full Stack Web Development — **January 2026**

Tech Studio Academy
